Explore the Lebanese Air Force base of **Hamat** in Lebanon, featuring a mid-1970s airfield utilized exclusively by the military. Witness MD-530F Defenders helicopters and Super Tucano light attack aircraft in action, all set against a backdrop of a heavily damaged runway with a rich history.

Hamat Air Base (Arabic: قاعدة حامات الجوية) is a Lebanese Air Force base in Hamat, Lebanon. It was built in the mid-1970s. The airport was however never used for civilian purposes. Although its heavily damaged runway (numerous holes as result of airstrikes) has been patched, the airfield is currently used only by the Lebanese Air Force with MD-530F Defenders helicopters and Super Tucano light attack aircraft. The airfield is also used by the Special Forces school. **Z190**

Experience [UKFY Dzhankoi AB](#), a military air base in Crimea, Ukraine, now operated by the Russian Aerospace Forces. The base hosts the Russian 39th Helicopter Regiment, flying various helicopter models, and has been the site of recent explosive events in April 2024. To enhance your simulation, additional files are required for this add-on.

UKFY Dzhankoi Raion, Crimea in Ukraine

Dzhankoi is a military air base (ICAO: [UKFY](#)) near Dzhankoi, Crimea.

It is currently operated by the Russian Aerospace Forces.

Prior to the Russian occupation of Crimea in 2014, Dzhankoi was Ukrainian, and before 1992 Soviet, military airfield, and then a civilian airport...

Operated by Russian Aerospace Forces

As of October 2022 the Russian 39th Helicopter Regiment, which flies the Kamov Ka-52

"Alligator" (NATO: Hokum B), Mil Mi-8AMTSh (NATO: Hip), Mil Mi-28N (NATO: Havoc) and Mil Mi-35M (NATO: Hind), used the base under the 27th Composite Aviation Division.

On 17 April 2024, six explosions were reported at the airbase in Crimea. Russian milbloggers and Ukrainian sources believe that ATACMS missiles or ballistic missiles were used. Some of these missiles deployed cluster munitions. At least six explosions and multiple secondary explosions were reported by locals. On 19 April, subsequent satellite pictures showed the destruction of three to five S-300/S-400 missiles, associated radars and other areas marked with "scorch marks" that suggested equipment that had been damaged but removed. Ukraine has since released footage of multiple missiles being launched at the air base.

Explore the **EYSA Airbase**, located at Šiauliai International Airport in Lithuania. This military facility serves as a key hub for the NATO Baltic Air Policing mission, ensuring air defense readiness over the Baltic States. Discover the history, facilities, and rotations of this crucial air base owned by the Lithuanian Armed Forces.

Šiauliai is the fourth largest city in Lithuania, with a population of 133,900. From 1994 to 2010 it was the capital of Šiauliai County.

EYSA Airbase

Šiauliai International Airport (IATA: SQQ, ICAO: **EYSA**) is indeed an airport located within Šiauliai Air Base, which serves as a major military facility for the Lithuanian Air Force. Additionally, it is one of the air bases involved in the NATO Baltic Air Policing mission. The airport is also historically known as Zokniai aerodrome and is situated approximately 7 kilometers (4.3 miles) southeast of the city of Šiauliai in northern Lithuania.

Needed: [UK2000](#), [Library2v14-cbj](#), Ethnicfs [mil+obj](#)

Key details about Šiauliai International Airport:

Ownership: The airport is owned and administered by the Lithuanian Armed Forces.

Facilities: It covers an area of 471 hectares and features two parallel runways.

NATO Air Base: Since 2004.

The first NATO F-16 jet fighters from the Belgian Air Component landed there in March 2004.

The Baltic Air Policing mission is a crucial component of NATO's air defense strategy, specifically aimed at safeguarding the airspace above the three Baltic countries: Estonia, Latvia, and Lithuania. Here are the key details about this mission:

Objective and Execution:

The mission's primary objective is to maintain **Quick Reaction Alert (QRA)** readiness for air defense. This means having fighter aircraft and crews on standby 24/7, 365 days a year, ready to respond swiftly to any potential airspace violations. The Baltic Air Policing mission is purely defensive in nature, focused on ensuring the integrity of the airspace over the Baltic States.

Air Policing Areas:

The airspace over the Baltic region is divided into two Air Policing Areas (APAs):

APA 1: Previously controlled by the CAOC Finderup in Denmark (deactivated in 2013).

APA 2: Currently controlled by the CAOC Uedem in Germany.

NATO member countries without their own Air Policing assets receive assistance from other NATO members:

Luxembourg is covered by interceptors from Belgium.

Slovenia is covered by the Italian Air Force.

Albania is covered by both Italian and Greek aircraft.

Deployment and Rotation:

Since March 2004, when the Baltic States joined NATO, the mission has been conducted on a three-month rotation basis.

Initially, the rotations were based at Zokniai Air Base in Lithuania. Starting from 2014, they shifted to the Ämari Air Base in Harju County, Estonia.

More recently, rotations have changed to a four-month basis.

Usual deployments consist of four fighter aircraft along with 50 to 100 support personnel.

Training and Standardization:

To ensure safe and professional Air Policing performance, adequate training is essential.

Headquarters Allied Air Command Ramstein introduced a series of training events, formerly known as Baltic Region Training Events, now referred to as Ramstein Alloy Home.

These events capitalize on experienced aircrews deployed to Šiauliai and offer superior training for the Estonian, Latvian, and Lithuanian air forces and control facilities.

Since the inception of the Baltic Air Policing mission in March 2004, there have been several incidents related to safeguarding the airspace above the Baltic countries of Estonia, Latvia, and Lithuania. Here are some key points:

Intercepts and Scrambles:

NATO aircraft routinely intercept Russian military aircraft near the Baltic States, especially when these aircraft fail to adhere to international air safety norms.

In 2019, Allied jets attached to NATO's Baltic air-policing mission scrambled approximately 200 times to safeguard allied airspace.

Specific Incidents:

While the overall number of incidents varies, it's essential to recognize that the mission involves continuous vigilance and readiness.

For instance, in June 2014, there was a notable spike in intercepts over the Baltic Sea, but the total number of incidents has been ongoing.

Additionally, in 2013, the Baltic patrol was called in when the Swedish Air Force was unable to respond to a simulated attack by Russian bombers against Stockholm.

In summary, the Baltic Air Policing mission remains active, with NATO member nations collaborating to ensure the security and integrity of Baltic airspace.

The Baltic Air Policing mission involves deploying fighter aircraft to guard the airspace above the three Baltic countries: Estonia, Latvia, and Lithuania. These aircraft are part of NATO's Quick Reaction Alert (QRA) system. Here are some details about the types of aircraft typically deployed for this mission:

Belgian F-16s:

Role: Leading the Baltic Air Policing mission.

Base: Operate out of Šiauliai Air Base in Lithuania.

Mission: Ensuring rapid response readiness for air defense.

Support: Assisted by German Eurofighter aircraft from Ämari Air Base in Estonia.

German Eurofighters:

Role: Supporting the mission.

Base: Operate from Ämari Air Base in Estonia.

Objective: Safeguarding Baltic airspace.

Collaboration: Work alongside the Belgian F-16s to maintain vigilance and readiness.

These aircraft rotations typically consist of four fighter jets, accompanied by 50 to 100 support personnel. Their primary task is to ensure the security and integrity of the Baltic States' airspace, responding swiftly to any incidents.

Let's explore the future of the Baltic Air Policing mission:

Current Situation:

Currently, air policing is performed primarily from the Šiauliai airfield in Lithuania, which has been recently renovated and improved. It operates 24/7 to ensure the security of Baltic airspace.

Upcoming Changes:

Ämari Air Base in Estonia, which has been a key hub for the mission, is undergoing reconstruction.

As a result, the NATO allied air policing of the Baltic region is set to move from Estonia to Latvia and Lithuania during 2024.

This shift reflects NATO's operational flexibility in the region and ensures continued air defense readiness.

The relocation will allow for necessary base upgrades while maintaining the mission's effectiveness.

Rotation and Leadership:

The 140 Expeditionary Air Wing, which assumed the lead role from Germany in NATO's combined Baltic Air Policing mission in April 2023, will continue its duties until August 2023.

Following that, the Spanish Air Force will take over with eight Eurofighters and one Airbus A400M3.

Additionally, other Eurofighter Typhoon squadrons, including the German Air Force, will continue to contribute armed patrol flights over Lithuania from various bases³.

In summary, while Ämari Air Base undergoes reconstruction, the Baltic Baltic mission remains dynamic, adapting to changes and ensuring the safety of Baltic skies.

Recent Deployments:

In 2023, members of the 140 EAW were deployed to Ämari Air Base in Estonia.

Their mission involved conducting Quick Reaction Alert (QRA) intercepts of Russian aircraft transiting close to NATO airspace.

A squadron of RAF Typhoon fighter jets was part of this deployment, ensuring rapid response readiness.

In summary, the 140 Expeditionary Air Wing has a rich history and continues to contribute to air defense and security operations in the Baltic region.

Explore the military hub of [Isa Air Base in Bahrain](#) with this Microsoft Flight Simulator add-on. Home to the Royal Bahraini Air Force Fighter Wing, including a variety of squadrons equipped with iconic aircraft like the F-16 Fighting Falcon and the British Aerospace Hawk. Ali Al Salem Air Base add-on provides a detailed recreation of the military air base in Kuwait, featuring accurate runway information and notable historical background. This work-in-progress scenery includes a chart for enhanced navigation. Make sure to have the UK2000 Lib and Animated Human 3D Models Library for the full experience.

Ali Al Salem Air Base (WIP) Chart included.

Ali Al Salem Air Base (ICAO: **OKAS**) is a military air base situated in Kuwait, approximately 23 miles (37 km) from the Iraqi border, and roughly 15 km west of Al Jahra. The airfield is owned by the Government of Kuwait, and hosted the Royal Air Force (RAF), United States Air Force (USAF), and United States Marine Corps (USMC) personnel and aircraft during Operation Southern Watch and Operation Iraqi Freedom. The base also hosted the Royal Air Force (RAF) during Operation Telic. Since the cessation of those operations, the base has been returned to the control of the Kuwaiti Government, with the USAF continuing to maintain a presence alongside their Kuwait Air Force counterparts. The principal USAF unit on base is the 386th Air Expeditionary Wing (386 AEW). The Kuwait Air Force Flight Training School is located at Ali Al Salem. The base is also home to the Air Force's attack and support helicopter squadrons.

Fly into the desert surroundings of **Dubai with the Nad Al Sheba grass strip** add-on, located near the bustling city of Dubai. Explore this simple yet unique airport, identified as OMDF or local AE-0088, in Microsoft Flight Simulator.

Nad Al Sheba airport near Dubai.

Nothings special, its just there.

OMDF or local AE-0088.

Explore the meticulously recreated Sweihan Air Base in Abu Dhabi, United Arab Emirates for Microsoft Flight Simulator. This military airport underwent a significant upgrade in 2010, featuring a new CAT II runway, parallel taxiways, and enhanced facilities. Immerse yourself in this realistic airport scenery by downloading the required folders and additional libraries for an authentic aviation experience.

In **FS2020 we just see OM11 as OMAW** because there is no knowledge (restricted) about this Sweihan Air Base connected to Zayed Air Base.

Sweihan Air Base (generated and rebuild from scratch).

Abu Dhabi Northeast Airport (CIAO: **OMAW**), also known as Sweihan Air Base, is a military airport located in Abu Dhabi, United Arab Emirates. The airbase was built somewhere around 1988-1990 and it was just a runway, short taxiway and an apron, till 2010 where it underwent a major upgrade, which included new 3800m CAT II runway, new taxiways parallel to the runway, more parking's and newer facilities for the airport. The expansion was completed in 2014.

You need to install both om11-om11 and xgsocgccdiv-airport-omaw-adne folders.

om11-om11 exludes the Asobo one.

Uncover the mysterious Qusahwira Air Base, a secret airport in the UAE desert, bordering Oman and Saudi Arabia. Located at latitude 22.77602 and longitude 55.06320, this new airbase on the Persian Gulf offers a unique and intriguing flying experience. Featuring one runway oriented at 9/27, this hidden gem awaits your exploration.

Qusahwira Air Base airport **AE-0127**

A secret airbase has emerged from the deserts in UAE, bordering Oman and Saudi Arabia.

New secret UAE airbase on the Persian Gulf - 6 years ago

This field is located in United Arab Emirates. The airport is located at latitude 22.77602 and longitude 55.06320. The airport has one runway: 9/27

Explore a detailed recreation of OMAD Al Bateen Airport, formerly known as Abu Dhabi International Airport, in Microsoft Flight Simulator. This add-on includes improved airport infrastructure, helipads, stands, and accurate representations of the area, bringing a new level of realism to your simming experience. Perfect for aviation enthusiasts looking to enhance their virtual flying adventures in the Abu Dhabi region.

The airport was built in the 1960s, and in 1970, the airport was inaugurated as Abu Dhabi International Airport.

In 1982, a new airport was opened on the mainland southeast of the city to accommodate the increasing air traffic.

In 1983, Al Bateen became a military airbase, known as Bateen Air Base.

Starting on 17 August 1990, two units of the United States Air Force deployed to Al Bateen in preparation of what would ultimately become the Gulf War. The first unit deployed to Al Bateen was the 50th Tactical Airlift Squadron from Little Rock Air Force Base, Arkansas with sixteen Lockheed C-130E Hercules transport aircraft. It was joined by the 41st Electronic Combat Squadron from Davis–Monthan Air Force Base, Arizona with ultimately six Lockheed EC-130H Compass Call electronic attack aircraft, starting 26 August 1990.

The airport remained under military control until 2008, when it became a civilian airport focusing on executive jets under the name Al Bateen Executive Airport.

On December 8, 2022, the airport was the site of the Viktor Bout–Brittney Griner prisoner exchange.

In April 2023, Jetex, Dubai-based aviation company, announced opening a private terminal (FBO) in Al Bateen Executive Airport.

OMAD Airport by request. Fully different to the unfinished stock one in MSFS2020.

Redrawn, the full airport - Heli pads, Stands etc... and has no offset as the startscreen pretends to show.
